Presented Staff Report. Applicant had a correction on Staff Report with the closest residence being 1500' feet away from the pit. Public Comment from the new Google Form was read. Discussion began about whether the road truly was accessible based off of Public Comment. Applicant addressed the amount of the quarries active and inactive in the area. Applicant talked about the availability of utilities (i.e. power being close by and toilets being portable). Hill brought up the idea of only rezoning the part of the tract in which the quarry is proposed on. Sharp mentioned that quarrying is a viable industry that is can only go so many places. Hill agreed that there are several operational quarries in the area. Applicant mentioned that the granite was mostly exposed. Robinson agreed with Sharp on quarrying being a good industry for the area. Drew appreciated the statement that there will be minimal blasting. Shealy motion to approve. Hill second. Unanimous.
